WARNINGS

- These units should be installed by a certified electrician in accordance with the National Electrical Code (NEC) and the Canadian Electrical Code (CEC).
- The unit requires a 120 volt, 60 Hz power source and should be installed on a GFCI protected circuit.
- Plug-in units should be connected to a grounded outlet with a minimum rating of 10 amps.
- Follow instructions to ensure the wall is securely fixed. Unit is designed for drying towels. Under no circumstances should anyone climb on or hang on unit.
- Unit is intended for indoor use only. Do not place units inside a shower, sauna, steam room, or wherever unit would be exposed to water.

CAUTION

- As this is a heating device, the surface temperature can increase depending on the ambient temperature in the room and the number of tiles apply to the unit.
- Overloading the unit can cause the unit to become extremely hot and they result in a burn if touched and or damage the towels.
- The fasteners provided with installation kit are for convenience only and are not suitable for all installation conditions.
- It is the ultimate responsibility of the installer to ensure proper mounting hardware is employed in attaching the unit to the wall.

OPERATING INSTRUCTION

- After installation, connect electrical power.
- Remove the protective cover from the switch and turn it to the on position.
- The indicator light will glow red and the towel warmer will start to heat — allow 10–20 minutes to heat up.
- This towel warmer has been designed to run continuously—turn off the switch or unplug the cord in the tower is not in use for long periods of time.
- Never use an extension cord for plug-in models.
