WARNINGS
- These units should be installed by a certified electrician in accordance with the National Electrical Code (NEC) and the Canadian Electrical Code (CEC).
- The unit requires a 120 volt, 60Hz power source and should be installed on a GFCI protected circuit.
- Plug-in units should be connected to a grounded outlet with a minimum rating of 10 amps.
- Follow installation instructions to ensure unit is securely fixed to wall. Unit is designed for drying towels. Under no circumstances should anybody climb on or hang on unit.
- Unit is intended for indoor use only. Do not place units inside a shower, sauna, steam room, or wherever unit would be exposed to water.

CAUTION
- As this is a heating device, the surface temperature can increase depending on the ambient temperature in the room and the number of towels applied to the unit.
- Overloading the unit will cause more than one towel to become extremely hot and may result in a burn if touched and/or damage to towels.
- The fasteners provided with the installation kit are for convenience only and are not suitable for all installation conditions.
- The ultimate responsibility of the installer to ensure suitable mounting hardware is used.

OPERATING INSTRUCTION
- After installation, connect the electric power.
- Remove the protective cover from the switch and turn it to the on position.
- The indicator light will glow red and the towel warmer will start to heat — Allow 10-20 minutes to heat up.
- This towel warmer has been designed to run continuously — Turn off the switch or unplug the cord when the towel warmer is not in use for long periods of time.
- Never use an extension cord for Plug-in models.

CARE & MAINTENANCE
- Towels which contain soap or detergent residue may appear to have scorch marks; this is simply discoloration of the residue in the towels themselves.
- The unit is constructed from extremely durable 304 stainless steel. To maintain a good appearance, follow these simple instructions:
  - For routine cleaning, simply switch off the unit, allow to cool to room temperature, wipe with a damp cloth and buff with a soft, dry cloth.
  - Under no circumstances should abrasive cleaners be used to clean the unit.

* For Hardwired Installation

TOOLS REQUIRED

- Screwdriver
- Wire Stripper
- Cable Tie

ELECTRICAL INFORMATION

60—80 watts | 0.5—0.67 amps | 120 volts

AVAILABLE MODELS

- RWHS-SP
- RWHS-SB
- RWHS-SMB
- P-Polished
- B-Brushed
- MB-Matte Black

! CAUTION — SURFACE OF UNIT IS HOT WHEN ON !
BEFORE STARTING ASSEMBLY MAKE SURE ALL COMPONENTS LISTED ARE IN THE PACKAGE

1. 18 3/8” 468mm
   9 1/2” 240mm

2. For hardwired installation cut plug from end of cable and follow wiring guide below
   [for plug-in installation ignore components H / I / J ]
   DO NOT OVER-TIGHTEN SET SCREW

3. TURN UNIT ON WITH SWITCH

! CAUTION — SURFACE OF UNIT IS HOT WHEN ON!
