INSTALLATION INSTRUCTIONS

WARNINGS

PLEASE READ THE FOLLOWING INFORMATION BEFORE INSTALLING AND USING YOUR HEATED TOWEL RACK.

- These units should be installed by a certified electrician in accordance with the National Electrical Code [NEC] and the Canadian Electrical Code [CEC].
- The unit requires a 120 volt, 60Hz power source and should be installed on a GFCI protected circuit.
- Plug-in units should be connected to a grounded outlet with a minimum rating of 10 amps.
- Follow installation instructions to ensure unit is securely fixed to wall. Unit is designed for drying towels. Under no circumstances should anybody climb on or hang on unit.
- Unit is intended for indoor use only. Do not place units inside a shower, sauna, steam room, or wherever unit would be exposed to water.
- To reduce the risk of electric shock, burns, fire or injury.
- Close supervision is necessary when this unit is used near children or disabled persons.
- Use this unit only for its intended use as described in this manual.
- Do not use outdoors.
- Do not alter the safety plug or use an extension cord with this device.
- Do not operate with a voltage converter.
- Do not touch hot surfaces.
- Do not use accessory attachments not recommended by the manufacturer as this may cause injuries.

CAUTION

- As this is a heating device, the surface temperature can increase depending on the ambient temperature in the room and the number of towels applied to the unit.
- Overloading the unit will cause the unit to become extremely hot and may result in a burn if touched and/or damage to towels.
- The fasteners provided with the installation kit are for convenience only and are not suitable for all installation conditions.
- It is the ultimate responsibility of the installer to ensure proper mounting hardware is employed in attaching the unit to the wall.

OPERATING INSTRUCTION

- After installation, connect the electric power.
- Turn on the wall switch and towel warmer will start to heat-Allow 10-20 minutes to heat up.
- This towel warmer has been designed to run continuously-wall switch when the towel warmer is not in use for long periods of time.

CARE & MAINTENANCE

- Towels which contain soap or detergent residue may appear to have scorch marks; this is simply discoloration of the residue in the towels themselves.
- The unit is constructed from extremely durable low carbon steel. To maintain a good appearance, follow these simple instructions:
- For routine cleaning, simply switch off the unit, allow to cool to room temperature, wipe with a damp cloth and buff with a soft, dry cloth.
- Under no circumstances should abrasive cleaners be used to clean the unit.
- If the product is damaged, do not repair by yourself, pls return to the maintenance center for repair.
